

About

The newly updated 'Maritime Cyber Security Awareness [for Seafarers]' course examines the definition of Cyber Security, the Cyber Threats that exist, the vulnerabilities onboard that there may be in ship IT and OT systems, and how they may be exploited.

The course then examines the measures that can be taken to mitigate and defend against these types of threats.

This course is designed to provide the user a firm grounding in Maritime Cyber Security issues and to encourage the understanding amongst all individuals in an organisation, because: 'Cyber Security is everyone's responsibility'

Awarding Body

This course is fully approved by the CPD Accreditation Board. Upon successful completion, learners will receive a PDF certificate via the eLearning system.
